

### Choose Between Butter, Other Cream Products

Paraphrase "You can't eat your cake and have it too" with "You can't have butter and drink it too" and you have started precisely what is happening to the nation's butter supply today, says Earl Maharg of the Agricultural Extension Service, University of California.

People of the nation are satisfying their pent up desire for milk—or maybe some half and half—some extra cream on their breakfast cereal, a dash of whipped cream on desserts, and an extra scoop of ice cream.

This demand for "liquid" butter is so great that "buttermaking-creameries" in Rocky Mountain states which normally ship to the Pacific coast are sending cream to the midwest at greater profit.

### Officers Must Hurry To Retain Commissions

Former Army officers who desire to regain their commissions for active service must have their applications in the Adjutant General's office in Washington not later than March 1, Captain Robert G. Abarr Army recruiting commander, Long Beach, has announced.

Any man who served as a commissioned officer in the Army between December 7, 1941 and the present, and whose separation was under honorable conditions, is eligible for reappointment. Application blanks may be obtained at any Army Recruiting office.

Appointments will be made in the grade of second or first lieutenant, captain or major. No officer will be appointed in a grade higher than that which he held in war time.

All branches of the service are open to these former officers, but if the application is for a branch other than that in which the applicant served, special qualifications must be listed.

### POPULATION GAIN IN LOS ANGELES IS 20 PER CENT

For every four persons in Los Angeles County in 1940 there are more than five now, it is shown in a report by the Los Angeles Chamber's Research Department.

Figures based on estimates by the California Taxpayers' Association show a 29 per cent population growth from 2,785,843 in 1940 to 3,584,000 as of Jan. 1, 1946.

The increase in the 14 southern counties is estimated at 31 per cent, bringing the new total to 5,243,000.

### Top Nazis at Trial

War-time Germany's big three are shown during recess of war crimes trial at Nuremberg. At war's outset Hitler named Reichsmarschal Hermann Goering (left) as No. 2 Nazi and Rudolf Hess (right) as third member of the hierarchy. Admiral Karl Doenitz (center) was Reich leader after Hitler's disappearance during final month of the siege of Berlin.

### Many Veterans' Dwelling Plans Filed With U. S.

Under the current veterans' housing priorities system, aimed at expediting construction of moderate-cost housing for veterans, which went into effect on Jan. 15, applications for a total of 6271 new dwellings to be constructed in Southern California exclusive of San Diego and Imperial Counties had been received by the local FHA office as of Feb. 1, it was announced by John E. McGovern, district director, Federal Housing Administration.

Of this total 3647 units have already received consideration, and the remaining 2624 units are still under construction, Mr. McGovern said.

"Of the applications received to date, 41 per cent stipulate sales prices of less than \$7500 for these properties which are to be offered for sale. 77 per cent of those properties which are to be offered for rent stipulate a maximum shelter rental of less than \$60 per month," he continued. "The top permissible sales price under the Priority Regulation No. 33 is \$10,000 including land and improvements, and the top maximum shelter rental permitted is \$80 a month."

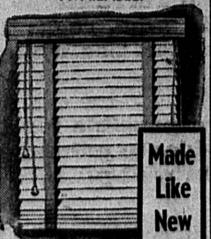

Under the new system the Civilian Production Administration has delegated to the FHA, through the National Housing Agency, the authority to process applications for and issue HH preference ratings for 11 items of building material now in critically short supply. Applicants must agree to hold the accommodations for sale or rental to veterans during the course of construction and, for 30 days thereafter.

Director McGovern said it still was too early to reach any definite conclusion as to whether the price distribution of the applications throughout the district is satisfactory, but every effort is being exerted by the FHA among home builders to induce the production of housing at price levels as much below the maximum as feasible.

Applicants for priorities must satisfy FHA that the proposed accommodations are reasonably related to the proposed sales price or rental and show they are ready to begin construction within 90 days, Mr. McGovern concluded.

### Bridge, Highway Budget Of L.A. County Revealed

Los Angeles county's highway and bridges program for the present fiscal year calls for an expenditure program of \$18,427,241 to be spent by the county government alone, California Taxpayers' Association said today, making public its study of county highway budgets in California for the current year. This does not include federal money available under the special federal appropriation for county feeder roads, recently made available by congress.

The county's highways and bridges program is to be financed \$5,400,000 from the county's share of gasoline tax receipts, \$1,800,000 from motor vehicle fees, \$222,154 from road district taxes, \$387,800 from miscellaneous federal, state, and county revenues, and \$5,587,277 from cash balances.

Over the state as a whole, the highways and bridges expenditure programs of the fifty-seven counties total \$43,909,811, with \$42,541,742 going for direct highway and bridges work and \$1,368,069 for bond interest and redemption.

### Electronics Training In Navy Valuable

Victory in war or individual success in civilian life is won by an intelligent application of scientific knowledge, Chief E. W. Gilson, recruiting in charge of the Navy Recruiting Station in San Pedro area, asserted today in pointing out that the Navy has one of the best Electronic Engineering schools in the country.

"The radio and television industries, the telephone and telegraph systems, just to mention a few, are eagerly seeking ex-Navy electronics engineers for their technical staffs," he said. He estimated that a similar course of instruction in private business institutions would cost \$15,000. Men going to the Navy school, in addition to free tuition and equipment, receive regular Navy pay, clothing, food and lodging, medical and dental care and in fact all of the privileges of a regular Navy man, in addition to privileges granted to specialized students, it was explained.

Men 17 through 30 may qualify for the school by taking the entrance examination before enlisting.

**SALVATION ARMY**  
Speaking of the work of the Salvation Army during the war, Congressman Cochran of Missouri, said: "Salvation Army clubs, hotels and mobile units gave service to approximately 2 million service men and women in all theaters of war during World War II."

### Driver Asleep Results In Head-On Wreck

Driving along Pacific Coast highway sleeping at the wheel of his car early Monday morning before daybreak, he said, Don A. Miller, aircraft worker living in Bellflower, was awakened by a head-on collision with another auto driven by a sailor, J. J. Zaretsky.

Zaretsky stated to Torrance police that he had observed Miller's car coming toward him weaving from side to side along the highway and that he had tried to avoid the collision by attempting to bring his auto to a halt when the accident occurred.

Miller said to police that he was unaware of the danger because he had fallen asleep. Both he and a passenger, R. C. Walbey, owner of the car driven by Zaretsky, were treated at the Torrance Memorial Hospital for injuries sustained.

### Electric Computer Industry, Labor, Govt. Agree On Job Training

An electric computer that solves twelve complex mathematical problems simultaneously will be one of many different instruments that Consolidated Engineering Corporation will display at "Our World of Tomorrow" Exposition, which opened Feb. 13, at the Civic Auditorium.

Designed originally to work in connection with C. E. C.'s mass spectrometer, the computer can be applied to any research department or business laboratory where problems of this nature need solving.

The mass spectrometer is a modern analytical device of high sensitivity and accuracy and is used extensively for new processes in the petroleum industry. Originally designed for the petroleum field it has since found wide application in many industrial and scientific fields, including the National Bureau of Standards and Bell Telephone Laboratories.

### CHRISTIAN SCIENCE LECTURE RADIOCAST SET FOR FEB. 15

Residents of this vicinity may hear a lecture on the subject "Christian Science: A Religion of Works" which will be broadcast over station KFVB (980 kc), Friday evening, Feb. 15, at 8 p.m., from Ninth Church of Christ, Scientist, Los Angeles. The lecturer, John S. Sammons, of Chicago, is a member of the Christian Science Board of Lectureship.

Industry, labor and government see eye to eye concerning apprenticeship training opportunities for veterans, it was disclosed by J. G. Caldwell, executive of the Torrance Veterans Service Center following a meeting of personnel of the Los Angeles Area Coordinated Veterans Service Centers, held at headquarters 306 W. Third st., Los Angeles.

Heading the round-table discussion of "How to Develop Apprenticeship Training," were Dr. Robert M. Ziegler, A. F. of L. Veterans Advisor; R. R. McFall, Field Representative, Division of Apprenticeship, California Department of Industrial Relations; and Noel M. Calhoun, Los Angeles contractor and Commissioner of State Apprenticeship Council.

It was agreed that every effort should be made to acquaint veterans with requirements for apprenticeship and job training, that veterans should also be advised as to the opportunities for employment in future years in the occupations for which they desire training, and only through the cooperation of management, labor and government can the veteran be given full advantage of educational job training.

Torrance Service Center 2300 Carson st. serves the following communities: Torrance, Gardena, Waltham, Palms Verdes, Lomita, Harbor City, Harbor Hills and Keystone.

If You Want **SAFE TIRES**  
Come In and Ask About the

**Firestone**

**2-WAY PLAN**

FOR YOUR **DRIVING SAFETY**

We Will Recap Your Present Smooth Tires For Winter Driving Safety

When New Firestone De Luxe Champtions Are Available to You We Will Equip Your Car and Buy Your Recapped Tires

All you have to do is drive in, and our Firestone tire experts will show you how to secure complete tire safety. Smooth, dangerous tires will be recapped by the famous Firestone Factory Method. You exchange smooth tire danger for the famous Gear-Grip Tread. Then when new Firestone De Luxe Champtions are available to you, we will buy your recapped tires. Stop in today for the driving safety you want and need!

**FIRESTONE DELUXE CHAMPION**  
The Tire that Stays Safer, Longer

Firestone De Luxe Champion Tires give car owners patented, exclusive construction features which assure extra safety and extra mileage at no extra cost. For most miles per dollar, choose Firestone De Luxe Champtions, the tires that stay safer, longer!

Listen to the Voice of Firestone every Monday evening over NBC.

**STONE & MYERS**

Announce a **NEW AIR SERVICE**

... to those who wish to ship remains to distant points.

This new Stone & Myers exclusive service enables the loved ones of deceased persons to have a fitting funeral service conducted in almost any city in the nation the following day, rather than a week by slow train.

The cost is nominal. Much less than you would think. We make all arrangements for you even including air tickets for the persons wishing to accompany the body.

We make phone contact with a reliable mortician in the city selected who is a fellow member of the National Selected Morticians or National Funeral Directors.

This process is reversed by those who wish remains at a distant point returned here for burial.

This is just one of the many services which are available at Stone & Myers.
